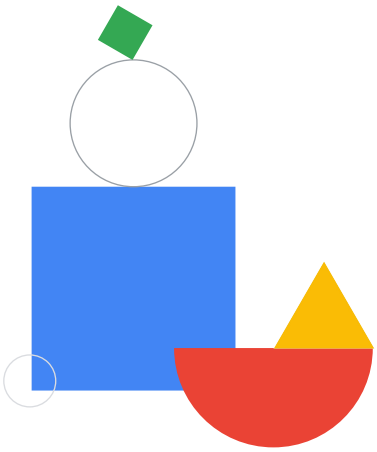
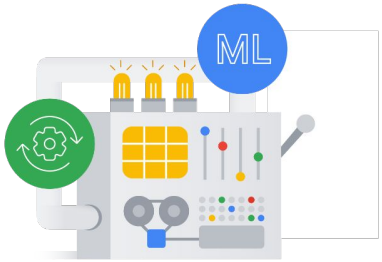
Machine Learning Operations (MLOps) Fundamentals



Google Cloud

Congratulations! You've made it to the end of the MLOps Fundamentals course.

Proprietary + Confidential



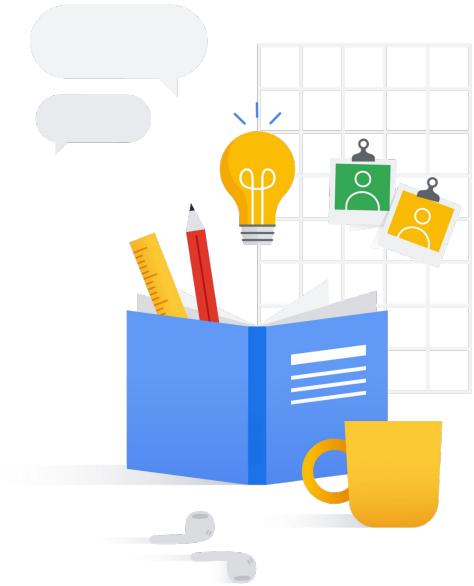
Google Cloud

Throughout the course, you've been introduced to the MLOps concept and the considerations behind it.

Proprietary + Confidential

What you learned:

Employing Machine Learning Operations



Google Cloud

In the first section of the course, Employing Machine Learning Operations, you explored ML models from an operational perspective.

Proprietary + Confidential

Google Cloud

Google Cloud

You first examined the challenges that ML practitioners currently face when they operationalize ML models and make them available for production.

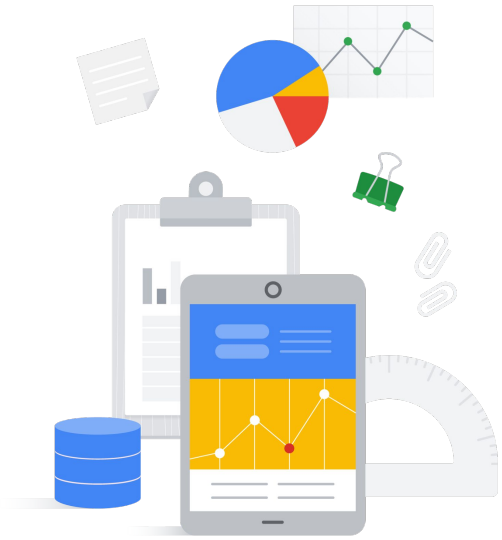
Then, you were introduced to the concept of DevOps in ML and the phases of the ML lifecycle.

After you explored the main phases of an ML lifecycle, you learned how these phases map to tasks within MLOps.

Proprietary + Confidential

What you learned:

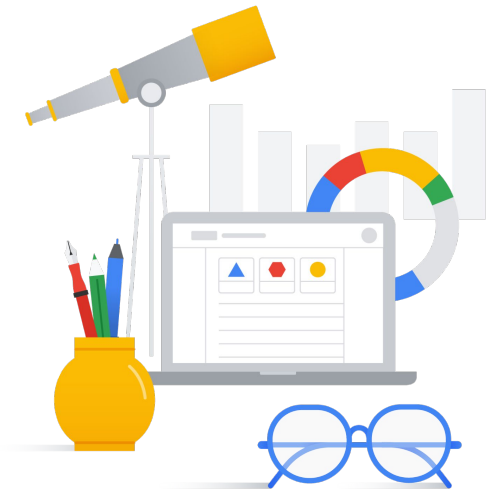
Vertex AI and MLOps on Vertex AI



Google Cloud

In the second part of the course, the Vertex AI and MLOps on Vertex AI, you explored what Vertex AI is and why a unified platform is useful.

Proprietary + Confidential



What you learned:

Hands-on lab
Vertex AI - Qwik Start

Google Cloud

In the hands-on lab at the end, you worked on a high-value, real-world use case: predictive customer life value.

You started with a local BigQuery and TensorFlow workflow and then progressed toward training and deploying your model in the cloud with Vertex AI.

Proprietary + Confidential

MLOps capabilities of Vertex AI

Google Cloud

Then you learned about the MLOps capabilities of Vertex AI and how Vertex AI helps with the MLOps workflow.
